

FOR IMMEDIATE RELEASE

IBM selects CellTrust Secure Global Gateway™ to Extend WebSphere Portal Dashboard Accelerator

New 6.1 Release Pairs Well With CellTrust's Mobile Security to Ensure Users a Trusted Environment

CTIA Wireless I.T. & Entertainment – San Francisco — September 9, 2008 — CellTrust Corporation (www.celltrust.com) a leading provider of Secure SMS and Secure Global Gateway, today announced it has been selected by IBM® to provide CellTrust's messaging to the worldwide customer base of the IBM Dashboard Accelerator, and Lotus ActiveInsight. Users wanting to send dashboard alerts to mobile devices can utilize the CellTrust Secure Global Gateway with reach to 218 countries and 700 carriers.

IBM Lotus ActiveInsight software, version 6.1, is a solution that works with the industry's leading IBM WebSphere Portal to help organizations define and communicate goals, view real-time metrics, and take action via composite, role-based dashboards and scorecards – thus helping to improve overall performance. Through the integration with CellTrust, ActiveInsight users will have the option of signing up for CellTrust Secure Global Gateway with consumer grade or Secure SMS to achieve organizational goals and objectives.

“CellTrust brings the industry a unique heritage and knowledge of Internet security,” said Larry Bowden, vice president, portals and mashups, IBM. “The ability to send Dashboard Information anywhere in the world, using CellTrust's secure infrastructure was an integral factor in our selection.”

CellTrust Secure Global Gateway is being adopted by more and more organizations as a means of communicating efficiently with the mobile workforce as well as consumers. SMS has proven to be popular, highly adaptable and well accepted among mobile phone users worldwide.

“With global anticipation of 2.3 trillion SMS messages in 2008 alone, it is critically important that high-risk, confidential data in the mobile environment be treated in a secure manner,” said CellTrust CEO Sean Moshir. “CellTrust's depth of experience with security translates well to the necessities of today's wireless world. We are pleased that IBM has taken note of our abilities and infrastructure and we look forward to providing IBM customers worldwide with mobile messaging.”

CellTrust's Secure Global Gateway allows businesses to exchange critical information with customers in a trusted environment on the mobile device. Setting itself apart from consumer-grade SMS, CellTrust's Secure SMS provides end-to-end privacy via a highly encrypted, tamper-proof transfer process. The sender also has the ability to confirm when text messages are delivered and/or read. The solution also allows no size limitations along with remote wipe functionality that ensures users can wipe the handset if it is lost or stolen.
